Subject: MICROSOFT SETTLEMENT

As a citizen of the US and a stockholder of Microsoft, I urge the Department of Justice to accept the terms of the settlement now on the table. It is our taxpayer dollars that pays for the litigation, it is our consumer dollars that pay for the products and it is our brains that choose the products that we want. In a country founded on the principals of equality and freedom, every company has a clear, even playing field, but only a few rise to the top. This is America, after all, and that is the reward of Democracy, but not of Socialism. I thank God all our voices can be heard.
